MAGIC WALL PANELS

ABOUT MAGIC

ONE SYSTEM.
ENDLESS POSSIBILITIES.

We create integrated surface systems that combine refined aesthetics, seamless functionality, and timeless beauty across every space.

WWW.MAGICWALL.COM

WHO WE ARE

We design and produce integrated surface solutions that unite aesthetics, functionality and innovation.

Magic Wall Panels is a global surface solutions brand specializing in decorative wall panels, integrated door and cabinet systems, and coordinated finish collections. We combine advanced production technology with refined material expertise to create seamless, timeless spaces with a unified design language.

INTEGRATED SYSTEMS

Wall, door and cabinet surfaces designed to work together in perfect harmony.

PREMIUM SURFACES

Carefully selected materials and refined finishes for elegant, sophisticated interiors.

SAME-COLOR HARMONY

One color, one texture, perfectly coordinated across every surface.

EFFORTLESS INSTALLATION

Engineered for fast, clean and practical on-site application.

QUALITY YOU CAN TRUST

Advanced production standards and strict quality control for lasting performance.

BUILT TO LAST.
Engineered for water resistance, durability, and long-term performance.

PRODUCT SYSTEM

ADVANCED DECORATIVE WALL PANEL SYSTEM

Our complete surface system brings together wall panels, doors and cabinet surfaces in a shared color and texture language. The result is a seamless visual flow, refined aesthetics and timeless interiors.

Home Decoration Commercial Spaces Office Buildings Villa Large Apartments Hotel

THE MAGIC WALL SYSTEM

A complete surface ecosystem that unites aesthetics, functionality and innovation.

Magic Wall Panels bring together wall panels, doors and cabinet surfaces within one unified color and texture language.

By combining advanced production technology with refined materials, we create seamless interiors defined by harmony, consistency and timeless appeal.

- PROTECTIVE SURFACE LAYER**
Advanced coating for scratch resistance and easy cleaning.
- DECORATIVE FINISH LAYER**
High-definition design layer with natural texture and visual depth.
- CORE MATERIAL**
High-performance core for strength, durability and structural stability.
- BALANCE LAYER**
Enhances dimensional stability and supports long-lasting performance.

SURFACE COLLECTIONS

THREE MATERIAL DIRECTIONS.
ONE COHESIVE DESIGN LANGUAGE.

Magic Wall Panels presents three distinct surface collections, each developed to serve a different spatial vision — from refined decorative interiors to integrated same-color systems and durable outdoor applications. Together, they form a versatile material universe where aesthetics, functionality and consistency come together across walls, doors, cabinets and architectural surfaces.

EXPLORE OUR PRODUCT COLLECTIONS

WWW.MAGICWALL.COM

01

High-end Decor Panels

Refined decorative panels with premium textures and sophisticated finishes, designed to bring depth, elegance and architectural character to interior spaces.

02

Same Color Door, Wall, Cabinet

An integrated surface system that applies the same color and texture across doors, walls and cabinets, creating a seamless, harmonious and highly coordinated interior language.

03

Outdoor & New Materials

Advanced outdoor surfaces and next-generation materials engineered for durability, weather resistance and contemporary architectural expression.

01

HIGH-END DECOR PANELS

TIMELESS SURFACES.
EXTRAORDINARY SPACES.

High-end Decor Panels bring together refined textures, natural beauty and premium finishes to create surfaces with depth, character and lasting sophistication.

OVERVIEW

High-end Decor Panels are designed to bring together refined aesthetics, material richness and architectural sophistication in one elevated surface collection. From natural textures and premium finishes to seamless wall applications, each panel is crafted to add depth, character and timeless elegance to interior spaces.

Technical Specifications

Property	Value
Standard length	3,000mm per piece
Fire rating	Class B
Formaldehyde emission	ENF (exceeds E0)
Surface	High-quality decorative film — paintable
Minimum order quantity	300 meters per color
Installation	Tongue-and-groove snap-fit
Production lead time	From 5 working days

APPLICATIONS

- High-end residential living rooms and bedrooms
- Hotel guestrooms and corridors
- Restaurant and private dining rooms
- Commercial lobbies and reception areas
- Office interiors and negotiation spaces

02

SAME COLOR DOOR, WALL, CABINET SYSTEM

HARMONY IN EVERY DETAIL.
UNITY IN EVERY SPACE.

The Same Color Door, Wall & Cabinet System creates a perfectly unified interior by applying the same color and texture language across doors, walls and cabinetry. Designed for seamless transitions and complete visual harmony, it brings clarity, sophistication and a highly coordinated look to contemporary living spaces.

OVERVIEW

The Same Color Door, Wall & Cabinet System creates a harmonious and cohesive interior by applying the same color and texture language across doors, walls and cabinetry. This integrated approach delivers a seamless, sophisticated look that enhances visual continuity and brings a calm, unified character to contemporary spaces.

SAME COLOR DOOR, WALL & CABINET SYSTEM

Integrated door, wall and cabinet solutions in seamless colors and finishes, creating visual harmony and a unified spatial experience.

Designed to elevate interior spaces with cohesive aesthetics and refined functionality.

WALL PANEL

Redefine eco-friendly quick-install walls

Independently developed and manufactured by Gooday Advanced Materials Co., Ltd. is a new type of environmentally friendly and integrated quick-installation wall decoration material that leads the future.

Core Technology

Selected raw materials: 3 types of 100% brand-new main materials are carefully selected, combined with 5 types of high-performance additives.
Craftsmanship with ingenuity: precision extrusion molding is carried out under high temperature and high pressure, ensuring stable and reliable quality.
Superior structure: scientifically composed of an environmentally friendly base material layer, an aldehyde-free hot-melt adhesive layer, and a high-end decorative surface layer, laying a solid foundation for excellent performance.

Versatile Style Compatibility

It easily fits mainstream decoration styles such as minimalist, light luxury, new chinese, italian, cream, wood, and european styles, satisfying all your aesthetic expectations for high-end commercial spaces and ideal homes.

Exceptional Performance

Ultimate environmental protection: exceeds the strict en1 standard, made from 100% brand-new eco-friendly raw materials, with 0 lead, 0 heavy metals, and no pungent odors, safeguarding home health.
Five-dimensional protection: class b fire retardancy, excellent water resistance and mildew resistance, and natural insect resistance, ensuring long-lasting durability.

Quick Installation Advantage

Adopting a modular design and paired with a convenient mortise-and-tenon structure. It enables efficient and time-saving installation. It supports the creation of diverse shapes (including flat, arc, right-angle bending, wave, grid, irregular designs, etc.), endowing spaces with infinite creative possibilities. With its excellent comprehensive performance and convenient installation experience, wall panel has become the first choice for global users to build healthy and stylish spaces.

COLOR OF WALL PANEL

Classified by material type: PVC, PP, PET, etc. (Note: For some specified patterns of PVC and PP, the order of matching-color film-covered decoration trim is supported; however, due to the influence of production processes, the order of matching-color film-covered decoration trim is not supported for all patterns of light luxury fabric art and PET.)

Serial number	Decorative layer	Thickness	Performance advantage
1	PVC	14-16 Filament fibers	Over 100 creative patterns/colors available for selection Excellent moldability, lightweight, and durable for long-term use. Non-toxic and odorless, easy to clean and maintain in daily life.
2	PP	16-18 Filament fibers	Imported skin-friendly texture, enjoying international quality. Touchable products, food-grade environmental protection and health. Effectively protecting the safety of the elderly, pregnant women and children.
3	Metal series	14-16 Filament fibers	Metal-like texture with fine groins and luster. Excellent adhesion, high flatness, and resistance to deformation. Anti-static, lightweight for easy transportation, and can be cut or bent freely.
4	Light luxury upholstery	30-40 Filament fibers	Inspired by Korean textile art. Highly reproduces the soft texture of fabric patterns, with exquisite and realistic colors. The surface is treated with a special protective layer, featuring moisture resistance and scratch resistance.
5	PET	30-35 Filament fibers	Glossy/matt deep embossed texture with realistic patterns. High hardness and flatness, excellent scratch and wear resistance. Effectively resists aging and yellowing, oil stain and corrosion resistant.

MAGIC
MAGIC
WALL PANELS

SOLID BOARD AND HOLLOW BOARD WITH OPTIONAL COLORS

Same Color Door-Wall-Cabinet System

DECOR PANEL

3-dimensional decor panel, say goodbye to flat surfaces, and easily achieve unlimited creative shapes

Free Styling

3-Dimensional shapes such as grilles, waves, and irregular shapes. All the decor panels are of the same color as the wall surface, without cracking or coming apart. It is not stiff when used in large quantities for commercial decoration and shows a high-end look when used in small areas for home decoration.

Easy To Installation

Seamless connection: utilizes an intuitive double groove for easy interlocking and seamless integration. User-friendly fastening: a dedicated clip mechanism enables perfect installations by individuals of all skill levels. Zero on-site work & high speed: eliminates the need for on-site cutting. Panels mount directly to the wall, enabling installation speeds of up to 100 m² per day.

Cost Concerns And Savings

Eliminate the costs of auxiliary materials. Standardized module production saves over 30% of the cost compared to on-site processing and shaping of wall panels. Support large-scale direct supply of tooling, and deliver projects of 10,000 square meters within 15 days.

Same Color Door-Wall-Cabinet System

Decor panel(regular type)

3-dimensional Decor panel, easily achieve unlimited creative shapes

Application site

For regular shaped boards, within the specified patterns/colors, there is no minimum order quantity requirement for matching color wrapping. If the pattern/color is beyond the specified range, matching color wrapping can be discussed separately based on specific circumstances provided that the minimum order quantity for commercial projects is met.

The doors, walls and cabinets are produced in the same factory and color, with no color difference to the naked eye. From the closing trim to the door frame, from the wall to the cabinet body and the door, the entire system is in the same color and matched. Supports customization of over 25 patterns, including free selection of wood grain, solid colors, etc.

Wall-Cabinet Integration Technique

The wall panels can be extended to customize the cabinet body of the same color, visually extending and enlarging the space. It combines decoration and storage, and the cabinet seems to grow out of the wall.

Same - Color Silent Wooden Door

Sturdy and silent structure, resistant to moisture and deformation. Door frame, door leaf, and wall in the same color, with invisible finishing and seamless joints. Customizable dimensions, with quality hardware accessories provided in one step.

Super Enf-Class Environmental Protection

The doors, walls and cabinets are produced in the same factory and color, with no color difference to the naked eye. From the edge line to the door frame, from the wall to the cabinet body and the door, the entire system is in the same color and matched. Supports customization of over 25 patterns, including free selection of wood grain, solid colors, etc.

OUTDOOR SERIES

PVC Exterior panel a new type of environmentally friendly building material made by mixing high-density PVC, wood powder and other eco-friendly materials. It features simulated wood grain on the surface, with water resistance, mildew resistance, UV resistance (no fading), inherent flame retardancy, and requires no painting or maintenance.

PVC Exterior panel adopts environmentally friendly recycled materials and has undergone three generations of technological iteration, breaking through traditional limitations. Its ASA co-extruded layer has significant advantages in weather resistance (20°C $\sim$ $+60^{\circ}\text{C}$) and service life (10 years), making it suitable for harsh environments such as high humidity and strong UV radiation.

Exceptional Longevity

ASA polymer protective layer boasts excellent weather resistance (UV resistance, acid and alkali resistance, fading resistance). After 2000 hours of direct sunlight exposure, its fading degree is $\leq$ Grade 3. It is non-water-absorbent and has a service life of 5-10 years. In contrast, PE material is relatively inferior, prone to aging, fading, deformation and cracking, with a service life of only 3 years.

Enhanced Safety

Superior flame-retardant performance, Significantly reduces fire hazards.

Enduring Aesthetics

6 Classic woodgrain finishes, Realistic textures | Fade-resistant colors.

Lightweight Efficiency

Lightweight construction for easy handling and installation, Reduced long-distance shipping costs.

Simplified Installation

Minimal thermal expansion $\rightarrow$ narrow joint gaps, Snap-lock system for rapid assembly.

Worried-Free

Highly resistant to cracking and warping, comes pre-finished to Eliminate the need for painting, and low maintenance cost.

PRODUCT INFORMATION

Specifications and craftsmanship of outdoor grilles

221 Outdoor Grille

Height: 2900mm Width: 226mm Thickness: 26mm
Craftsmanship: Natural color (high gloss), sanded finish (matte)

Specifications and craftsmanship of outdoor flooring

140 Outdoor Floor

Height: 2900mm Width: 140mm Thickness: 25mm
Craftsmanship: Natural color embossed (high gloss), sanded embossed (matte)

Specifications and craftsmanship of outdoor cladding panels

100 Exterior Wall Cladding - (U-joint)

Height: 2900mm Width: 119mm Thickness: 12mm
Craftsmanship: Splicing: U-joint

COMMON COLOR

Color ▼

✓ Exceptional Longevity

UV resistant | Corrosion proof | Water repellent
10-20 year service life

✓ Enhanced Safety

Superior flame-retardant performance
Significantly reduces fire hazards

✓ Enduring Aesthetics

6 classic woodgrain finishes
Realistic textures | Fade-resistant colors

✓ Lightweight Efficiency

Reduced weight for easier handling/installation
Lowers long-distance logistics costs

Snap-on installation

A proper gap should be left between the floors

✓ Simplified Installation

Minimal thermal expansion → Narrow joint gaps
Snap-lock system for rapid assembly

✓ Near-zero Maintenance

Dense surface resists stains/mold
Virtually maintenance-free

MOUNTING ACCESSORIES

Must-have accessories

8mm type fastener(Seam gap 1.5mm)
(Suitable for wood-plastic flooring)

8mm square fastener(Seam gap 5mm)
(Suitable for wood-plastic flooring)

8mm starting fastener
(Suitable for wood-plastic flooring)

8mm end fastener
(Suitable for wood-plastic flooring)

Stainless steel drill steel screws
(Suitable for grid plates and floor boards)

Expansion screw
(Suitable for grid plates and floor boards)

ASA co-extruded corner line
(Suitable for grid plates and floor boards)
